## WEST WING TO OPERATE SKYTRANS TOWNSVILLE/PALM ISLAND SERVICE

Skytrans is pleased to announce that effective 1 February 2010, West Wing Aviation will be operating the Townsville/Palm Island service.

*"This is a positive move for both companies. From the perspective of Skytrans, it will allow us to focus on the Dash 8 market which is now our core business and for West Wing Aviation, they will be taking over a sound, operationally secure route"* said Simon Wild, Managing Director, Skytrans.

*"We are extremely pleased with the outcome and look forward to operating the route and continuing this vital service between Townsville and Palm Island. All Skytrans customer service based staff at the Townsville base have been offered similar positions with us and we are confident that their knowledge and experience will be an asset to our airline"* said Peter Collings, Director, West Wing Aviation.

All bookings will be administered through Skytrans and operations will continue utilising the existing Skytrans Cessna 404 aircraft machines until 31 March 2010 to allow for a gradual takeover.

For further information and bookings, please visit [www.skytrans.com.au](http://www.skytrans.com.au) or call 1300 759 872.
